Riolog	(Inter Part – I) y (Objective)	540-2		Paper (I)
·	1 00	PAPER COD	E 2461	Maximum Marks:- 17
		1 1' stime time apportion of	A B C and D The choice	which you think is correct; fil
result in	zero mark in that question. V	Write PAPER CODE, which	is printed on this question	paper, on the both sides of the
Answer	Sheet and fill bubbles accordi	ingly, otherwise the student w	vill be responsible for the sit	uation. Use of Ink Remover of O. 1
white co	practing fluid is not allowed.			Q. 1
1)	The geological period st	arting from 225 million y	ears ago is	(D) Cillippion
	(A) Jurrasic	(B) Permian	(C) Triassic	(D) Sillurian
2)	Biologically the most co	mmon hexose is		(D) 16
	(A) Fructose	(B) Glucose	(C) Galactose	(D) Mannose
3)	The optimum pH for Par	ncreatic Lipase is		(D) 13
	(A) 3	(B) 6	(C) 9 '	(D) 12
4)	The outer surface of cist	ernae of Golgi complex i	is	
, .,	(A) Concave	(B) Convex	(C) Flattened	(D) Round
5)	About 60% of Adults are	e immune to		
3)	(A) Measels	(B) Small Pox	(C) Rubella	(D) Mumps
6)	Many species of cyanob			
. 0)	(A) Water Blooms	(B) Algal Blooms	(C) Blooms	(D) Fungal Blooms
71	The giant amoeba obtain			
(1)	(A) Virus	(B) Cyanobacteria	(C) Bacteria	(D) E.Coli
8)		(B) Soil Pollution	(C) Water Pollution	(D) Air Pollution
03	(A) Pollution			
9)	The arrangement of leav	(B) Alternate	(C) Solitary	(D) Upper and Lower
	(A) Spiral	ha goological pame of		
1()) Pheritima posthuma is t	(B) Earthworm	(C) Leech	(D) Chaetopterus
	(A) Nerries	(D) Calulworm		
. 1]) Bilateral symmetry in a	nimais is best colerated v	(C) No tissues	(D) Porous
	(A) Diploblastic	(B) Triploblastic		needed
12	2) For Chloroplast to prod	uce Sugar from CO2 in u		(D) ATP
	(A) ADP	(B) NAD	(C) NADP	(12) 1211
1.	3) Which redox process is	endergonic	(C) Claratrais	(D) Krebs cycle
4	(A) Photosynthesis	(B) Respiration	(C) Glycolysis	(D) Itioes of the
14	4) Hepatic and Pancreatic	secretions are stimulated	by E	Amylase .
	(A) Gastrin	(B) Pepsin	(C) Secretin	ranylase
· p:	5) Human lungs are	in nature	50	(D) Warn
	(A) Waxy	(B) Spongy	(C) Fluffy	(D) Wavy
. 1	6) How Sugars are transpo	orted in plant cells?		D. Ciava
_	(A) By Sieve	(B) By Sieve Pipes	(C) By Sieve element	By Sieve
*			. Property of the state of the	Compounds
1	7) Disruptions of Control	system of the heart leads	to	
Ţ	(A) Hypertension	(B) Heart attack	(C) Stroke	(D) Haemorrhage
	(11) Hypotherical		(1)

	112 Dia						n paper except your R	oll No.			
		•	ubjective)		on 2018-20 to		Paper (I)				
	1 11	ne Anowec	1: 2.40 ho	urs	(Inter Part - I)) 	Maximum Marks:	68			
2.	An	swer brief	ly any Eigl	nt parts fro	m the followi	ngs:- ^I	$8 \times 2 = 16$	5			
(i)	Wh	Why glycerol is important for the Synthesis of triglycerides?									
(ii)	Wh	Why in human body vitamins are required in small quantity?									
(iii)	Wh	Why apoenzyme is non-functional? (iv) Why without enzymes life is impossible?									
(v)		That is histoplasmosis? (vi) Differentiate between plasmogamy and karyogamy.									
(vii)	Wh	What is Swim bladder. In which fishes it is found? (viii) What are urochordates?									
(ix)	Enl	Enlist three basic characteristics of chordates. (x) What is metamorphosis?									
(xi)	Wh	What is lactic acid fermentation? (xii) What is chemiosmosis?									
3.	An	Answer briefly any Eight parts from the followings:- $8 \times 2 = 16$									
(i) '	How does theory differ from law? (ii) Define the term species with example.										
(iii)	How is centriole important for cell? (iv) Why name peroxisome was applied for this organelle?										
(v)	Wri	Write importance of Algae. (vi) What are Actinopods? Give example.									
(vii)	Hov	How do Red Algae play important role in marine environment?									
(viii)	Wh	Why do biologist regard protists kingdom as polyphyletic group?									
(ix)	Wha	What are Sori? (x) Differentiate between Antheridium and Archegonium.									
(xi)	Hov	How heart sound is produced?									
(xii)	Diff	ferentiate b	etween clos	sed and ope	n blood circula	atory system.	ă,				
4.	Ans	wer briefl	y any Six p	parts from	the followings	S:-	$6 \times 2 =$	12			
(i)	In w	which state	phage is cal	lled propha	ge.	(ii) What are	Pili, Write their fund	ction.			
(iii)	Diff	Differentiate b/w Facultative and obligate parasite. (iv) Write the ingredients of Saliva.									
(v)	Wh	at is botuli	sm and its	cause.		(vi) Why the	larynx is called voic	e box.			
(vii)	Why	y respirator	y system in	birds is me	ore efficient an	d elaborate.		;			
(viii)	Why	the person	suffering fi	rom emphys	sema becomes l	oreathless and ex	khausted even at least	exertion.			
(ix)	Nan	ne the proce	ess by whic	h oxygen p	asses from an	alveolus in the	lungs into the blood.				
				Se	ction	II		1.			
Note:	Atte		hree questi				$(8\times 3=24$,			
5.)	(a)	To contro	l diseases,	how biolog	y has played it	s role through v	raccination and treat	ment?			
	(b)	Discuss b	lood plasm	a in detail?		* **					
6.	(a)	Explain the	ne primary	structure of	protein with e	xample of insul	in and haemoglobin				
	(b)	Write do	wn differen	t methods o	of A Sexual rep	production in fu	ngi.				
7.	(a)	Compare photosynthesis in euhacteria and cyanobacteria with special reference to oxygenic photosynthesis in cyanobacteria.									
	(b)	Relate het		nd modifica	tion of megas	porangium with	adoptation of seed l	abit in			
8.	(a)	Discuss B	iological jo	ourney from	two to five ki	ngdom classific	ation system.				
×	(b)	Sketch No	on-cyclic pl	nosphorylat	ion with energ	y yielding steps					
9.	(a)	What are	plastids? W	rite their th	ree types in de	etail?					
	(b)	Give role	of liver and	1 nonoroga i	n diadetion
