SGD-11-G1-P1 Warning:- Please write your Roll No. in the space provided and sign Roll No-----(Inter Part - I) (Session 2019-21 to 2022-24) Sig. of Student ----Chemistry (Objective) (Group - I) Paper (I) Time Allowed: - 20 minutes **PAPER CODE 2481** Maximum Marks:- 17 Note:- You have four choices for each objective type question as A, B, C and D. The choice which you think is correct; fill that circle in front of that question number. Use marker or pen to fill the circles, Cutting or filling two or more circles will result in zero mark in that question. Write PAPER CODE, which is printed on this question paper, on the both sides of the Answer Sheet and fill bubbles accordingly, otherwise the student will be responsible for the situation. Use of Ink Remover or white correcting fluid is not allowed. **O**. 1 1) The volume occupied by 1.4 g of N_2 at S.T.P. is (C) 22.4 dm^3 (A) 1.12 dm^3 (B) 2.24 dm^3 (D) 112 cm³ 2) Which of the following is a monoisotopic element. (A) Silver (B) Calcium (C) Chlorine (D) Fluorine 3) Which of the following can be sublime. (A) Calcium (B) NaCl (C) Naphthalene (D) Na_2CO_3 4) Constant factor in charlie's law. (A) Volume (B) Pressure (C) Tempreture (D) Both V and T 5) The order of rate of diffusion of gases NH₃, SO₂, Cl₂ and CO₂ is (A) NH₃>CO₂>SO₂>Cl₂ (B) NH₃>SO₂>Cl₂>CO₂ (C) Cl₂>SO₂>CO₂>NH₃ (D) NH₃>CO₂>Cl₂>SO₂ 6) Which of the following is amorphous solid (A) NaCl (B) Glass (C) NaBr (D) CaF₂ 7) Which of the following has highest vapour pressure at 25°C. (A) Mercury (B) Ethanol (C) $CC\ell_4$ (D) Chloroform 8) When 6d orbital is complete the entering electron goes into (A) 7f (B) 7s (D) 7p 9) Number of bonds in nitrogen molecule is (B) Three sigma (C) Two sigma and one π (D) One σ and Two π (A) One σ and one π 10) Units of energy in which heat changes in S.I system are. (A) Joule (B) Torr (C) Erg (D) Newton 11) The net heat change in a chemical reaction is same weather the reaction completes in one step or several steps. It is known as (A) Henry's law (B) Joule's principle (C) Hesse's law (D) Law of conservation of energy 12) Mixture of NH₄OH and NH₄Cl makes a buffer whose pH is (A) less than seven (B) 7 (C) More than seven (D) 4 13) For the reaction $N_2+3H_2 \rightleftharpoons 2NH_3$, The pressure at optimum condition is. (A) 100 atm (B) 600 atm (C) 200-300 atm (D) 1000 atm 14) Molarity of pure water is. (A) 01(B) 55.5 (C) 18(D) 8 15) If a strip of Cu metal is placed in a solution of FeSO₄ (B) Fe is precipitated out (C) Cu and Fe both (A) Cu will be (D) No reaction takes deposited dissolved place 16) Oxidation number of Mn in KMnO₄ is (A) +5(B) + 7(D) +217) The unit of rate constant is the same as that of the rate of reaction in (A) First order reaction (B) Second order (C) Zero order reaction (D) Third order

1123 - 1123 - 18000 (1)

reaction

Themistry (Objective) (Group-II) Paper (I) Time Allowed:- 20 minutes PAPER CODE 248B Maximum Marks:- 17 oter- You have four choices for each objective type question as A, B, C and D. The choice which you think is correct; fix at circle in front of that question number. Use marker or pen to fill the circles. Cutting or filling two or more circles will tin zero mark in that question. Write PAPER CODE, which is printed on this question paper, on the both sides of th saver Sheet and fill bubbles accordingly, otherwise the student will be responsible for the situation. Use of Ink Remover of the correcting fluid is not allowed. $(7D) - II - III -$	7L	(Inter Part – I)	(Session 2019-21 to	, 0	rudent
ote: You have four choices for each objective type question as A, B, C and D. The choice which you think is correct, if a circle in front of that question number. Use marker or pen to fill the circles. Cutting or filling two or more circles wist in zero mark in that question. Write PAPER CODE, which is printed on this question paper, on the both sides of the suit in zero mark in that question. Write PAPER CODE, which is printed on this question paper, on the both sides of the suit in zero mark in that question. Write PAPER CODE, which is printed on this question paper, on the both sides of the suit in zero mark in that question. Write PAPER CODE, which is printed on this question paper, on the both sides of the suit in zero mark in that question. Write PAPER CODE, which is printed on this question paper, on the both sides of the suit in zero mark in that question. Write PAPER CODE, which is printed on this question paper, on the both sides of the suit in zero mark in that question. Write PAPER CODE, which is printed on this question paper, on the both sides of the suit in zero mark in the paper. The suit is suit to fill the circles. Cutting or fill the circ				_	
at circle in front of that question number. Use marker or pen to fill the circles. Cutting or filling two or more circles of this ways in azero mark in that question. Write PAPER CODE, which is printed on this question paper, on the both sides of this ways. Which is printed on this question paper, on the both sides of this ways. Which is printed on this question paper, on the both sides of this ways. Which is printed on this question paper, on the both sides of this ways. Which is printed on this question. Use of lnk Remover of the correcting fluid is not allowed. SQ1 P1 - $\sqrt{2-1}$ Q. 1 1) Which of the following has hydrogen bonding? (A) CH4 (B) $CC\ell_4$ (C) NH3 (D) SiH4 2) The electron affinity of chlorine is. (A) $-349 \text{ k/l mol}^{-1}$ (B) $-249 \text{ k/l mol}^{-1}$ (C) $-449 \text{ k/l mol}^{-1}$ (D) $+396 \text{ k/l mol}^{-1}$ 3) Acid having $K_a > 1$ will be . (A) Weak (B) Very weak (C) Moderate (D) Strong 4) 18 g glucose is dissolved in 90 g of water. The relative lowering of vapour pressure is equal to (A) $1/5$ (B) -310 k/s^{-1} (D) -310 k/s^{-1} (C) $-249 \text{ k/l mol}^{-1}$ (D) -310 k/s^{-1} (D)					
sult in zero mark in that question. Write PAPER CODE, which is printed on this question paper, on the both sides of this were Sheet and fill bubbles accordingly, otherwise the student will be responsible for the situation. Use of lank Remover of the correcting fluid is not allowed.	ote:- at circ	the in front of that question r	number. Use marker or pen to	of fill the circles. Cutting or	filling two or more circles will
ite correcting fluid is not allowed. $S(J_1D-II-C_1Z_2-P_1Z_2)$ Q. 1 1) Which of the following has hydrogen bonding? (A) CH ₄ (B) $CC\ell_4$ (C) NH ₃ (D) SiH ₄ 2) The electron affinity of chlorine is. (A) -349 kJ mol^{-1} (B) -249 kJ mol^{-1} (C) -449 kJ mol^{-1} (D) +396 kJ mol^{-1} 3) Acid having $K_a > 1$ will be. (A) Weak (B) Very weak (C) Moderate (D) Strong 4 18 g glucose is dissolved in 90 g of water. The relative lowering of vapour pressure is equal to (A) $1/5$ (B) 5.1 (C) $1/51$ (D) 6 5) Orbitals having same energy are called: (A) unhybrid orbitals (B) valence orbitals (C) degenerate orbitals (D) d-orbitals (A) 1.12 dm ³ (B) 2.24 dm ³ (C) 22.41 dm ³ (D) 112 dm ³ 7) Partial pressure of oxygen in air at sea level is.
