

OPHTHALMIC TECHNIQUES HSSC-II

SECTION – A (Marks 20)

106

Time allowed: 25 Minutes

Version Number	4	4	6	1
----------------	---	---	---	---

Note: Section – A is compulsory. All parts of this section are to be answered on the separately provided OMR Answer Sheet which should be completed in the first 25 minutes and handed over to the Centre Superintendent. Deleting/overwriting is not allowed. Do not use lead pencil.

Q. 1 Choose the correct answer A / B / C / D by filling the relevant bubble for each question on the OMR Answer Sheet according to the instructions given there. Each part carries one mark.

- 1) Which of the following does **NOT** fit in line with the others?
 - A. Nebula
 - B. Macula
 - C. Leukoma
 - D. Leukaemia
- 2) Blood in the anterior chamber is called:
 - A. Hyphaema
 - B. Hypopion
 - C. Glaucoma
 - D. Haemosiderosis
- 3) The corneal nutrition is **NOT** from:
 - A. Aqueous
 - B. Limbus capillaries
 - C. O₂ from air
 - D. Ciliary body
- 4) The dendritic ulcer in cornea is typical of:
 - A. Varicella zoster
 - B. Pseudomonas
 - C. Herpes Simplex
 - D. Aspergillus
- 5) The most common type of cataract is:
 - A. Senile
 - B. Diabetic
 - C. Congenital
 - D. Traumatic
- 6) Diminished vision in day light occurs in:
 - A. Zonular cataract only
 - B. Central cataract only
 - C. Peripheral cataract only
 - D. All of these
- 7) Vitamin A deficiency will cause:
 - A. Keratomalacia only
 - B. Night blindness only
 - C. Xerosis only
 - D. All of these
- 8) The most common method of drug delivery to the eye is:
 - A. Injection
 - B. Ointment
 - C. Implants
 - D. Drops
- 9) Slit lamp is an instrument used for inspection of:
 - A. Anterior segment
 - B. Visual acuity
 - C. Vitreous
 - D. Retina
- 10) The normal trichromatic colour vision consists of:
 - A. Red, Blue, Green
 - B. Red, Yellow, White
 - C. Red, Blue, Yellow
 - D. None of these
- 11) Gradual loss of vision occurs in all **EXCEPT**:
 - A. Cataract
 - B. Glaucoma
 - C. Retinal detachment
 - D. Vitamin A deficiency

- 12) Anaesthesia and akinesia for eye surgery is achieved by:
- A. F. Nerve block
 - B. Retinal bulbar inj
 - C. Xylocaine drops
 - D. All of these
- 13) Which of the following is the operation of choice for cataract?
- A. ECCE
 - B. Phaco emulsification
 - C. ICCE
 - D. None of these
- 14) Which of the following does **NOT** fit with the others, in properties?
- A. Lens
 - B. Cornea
 - C. Vitreous
 - D. Choroid
- 15) Which one is a pupil dilator?
- A. Parasymp. Stimulation
 - B. Sympathetic stimulation
 - C. Oculomotor
 - D. Trigeminal
- 16) In which lobe is the center for vision situated?
- A. Frontal
 - B. Parietal
 - C. Temporal
 - D. Occipital
- 17) Which of the following is **NOT** a symptom for corneal ulcer?
- A. Pain
 - B. Loss of sensations
 - C. Lacrimation
 - D. Photophobia
- 18) Which of the following is **NOT** treated by Laser?
- A. Retinal detach
 - B. Diabetic retinopathy
 - C. Hypertension retinopathy
 - D. Cataract
- 19) Which is **NOT** true about Ulcerative blepharitis?
- A. Small ulcers bleed
 - B. Yellow crusts removed
 - C. White crust not found
 - D. Staphylococci
- 20) Which one is NOT in line with others?
- A. Trichiasis
 - B. Entropion
 - C. Corneal ulcer
 - D. Ectropion

OPHTHALMIC TECHNIQUES HSSC-II

107

Time allowed: 2:35 Hours

Total Marks Sections B and C: 80

NOTE: Answer any ten parts from Section 'B' and any three questions from Section 'C' on the separately provided answer book. Use supplementary answer sheet i.e. Sheet-B if required. Write your answers neatly and legibly.

SECTION – B (Marks 50)

Q. 2 Answer any TEN parts. The answer to each part should not exceed 2 to 4 lines. (10 x 5 = 50)

- (i) What are two types of muscles of iris? Write their nerve supply also.
- (ii) Draw and label the Lacrimal passage.
- (iii) Write down the uses of Laser in the eye diseases.
- (iv) Enumerate some causes of gradual loss of vision.
- (v) Define Myopia; draw a simple sketch of light rays in it.
- (vi) Write about 'Progressive' and 'Regressive' Pannus.
- (vii) What is 'Ophthalmia Neonatorum'?
- (viii) Write a short note on blindness.
- (ix) What are different methods of sterilization?
- (x) Discuss how the 'Binocular vision' is superior than the 'Monocular vision'.
- (xi) Write names of parts of visual pathways (from optic disc – upto cerebral cortex).
- (xii) Draw diagram of natural lens of eye. What is its change of shape during distant and near vision?
- (xiii) Write causes and treatment of sub-conjunctival haemorrhage.

SECTION – C (Marks 30)

Note: Attempt any THREE questions. All questions carry equal marks. (3 x 10 = 30)

- Q. 3** Write names, functions and nerve supply of all the extra and intra-ocular muscles.
- Q. 4** What is difference between Lacrimation and Epiphora? Give causes of each.
- Q. 5** Define sympathetic ophthalmitis. What are its causes and treatment?
- Q. 6** Write a comprehensive note on drug delivery to the eye.
- Q. 7** What is Triad of Glaucoma? What are causes of increased pressure in glaucoma?

1. The first part of the document discusses the importance of education in the 21st century. It highlights the need for students to have strong foundational skills in reading, writing, and mathematics. Additionally, it emphasizes the importance of critical thinking and problem-solving skills, which are essential for success in a rapidly changing world.
